

TIME-SERT®

DRAIN PAN SEAT RECONDITION CUTTER

SEAT CUTTER

Driver tool NOT included.

NOTE:
DRIVER TOOL NOT INCLUDED
1. Use WD40 on driver tool.

Start driver tool into the hole, continue until the driver tool is approx. ¼ inch below the surface.

Leaving the driver ¼ inch below the surface ensures that the seat cutter will not hit the back of the driver threads.

Use WD40 on cutter.

Using a 23mm socket rotate the seat cutter FULL 360 degrees rotations. After a few turns lift the seat cutter to inspect the seat. Repeat this operation until the seat is cleaned up.

Remove tools.

REPAIR COMPLETE:

Drain plug will now seal on new reconditioned seat.
